Ensuring Learning Through Education

Budget: \$31,500 over three years. Year One fully funded, \$9,395 remaining for Year Two

Update:

This project feeds nearly 300 children two meals a day (10am porridge and lunch) at a school set in the slum of Kawangware. Many of the children come to school without having eaten breakfast. Without the school feeding them, many children would only eat once a day.

By providing food, it ensures firstly, that the children come to school, and secondly, that they are able to learn once they are there.

The community surrounding the school greatly appreciate the care the school takes of these children. Supplying food for the children helps out the parents who are often day labourers if they have work at all. Our partners tell us that though the parents pay a small fee for their children to attend the school, they know they aren't covering the full

costs of educating and feeding their children, and they are extremely grateful for what the school does.

Our partners are determined to improve the future of these children, through teaching them character as well as giving them an academic education. Our nutrition program is a key element of ensuring these children have a better future*. On behalf of our partners, the children, and their families, thank you for giving them hope as well as a full stomach!

*Studies show malnutrition in childhood impacts the earning capacity of an adult for their entire working life, as well as having ongoing health impacts.
